Summary

Backend Engineer with 5 years of experience specializing in **Java, Spring Boot, and Microservices**. Proven expertise in **digital payments, fintech systems, and transaction services**, building scalable APIs, secure integrations (REST/ISO 8583), and high-volume financial applications. Strong focus on **secure coding, system monitoring, and performance optimization** with Kafka, Hazelcast, and relational databases (PostgreSQL, MySQL, Oracle).

Education

Bachelor of Science

(Material Physics)

Universitas Pendidikan

Indonesia, 2020 (GPA 3.54)

Professional experience

Full Stack Programmer

PT Jalin Pembayaran Nusantara | 2023 – Present

- Built KKI Online Payment and NFC Payment systems with Spring Boot/WebFlux, integrating REST & ISO 8583 gateways.
- Developed Payment Integrator and QRIS Message Mapper, enabling scalable biller/member onboarding.
- Implemented fraud detection, merchant validation, structured logging, and monitoring dashboards.
- Technologies: Spring Boot, Kafka, Hazelcast, MySQL, NodeJS, API Management.

Junior Application Developer

PT Mitra Integrasi Informatika | 2021 – 2023

On site as outsource employee at Jalin (2022-2023) as Java Developer and AstraPay (2021 – 2022) as Software Engineer

- Developed claim management websites using Apache Tapestry (Java) and automated data parsing from .txt files for reconciliation reports, then create financial report generators in .txt and .xlsx formats.
- Migrated monolith to microservices architecture for Cash-In, Cash-Out, Payment, and Transaction services.
- Integrated APIs with banks/aggregators for top-up, withdrawal, and settlement.
- Built real-time balance management and asynchronous batching for transaction reconciliation.
- Technologies: Java Spring Boot, PostgreSQL, REST/SOAP APIs.
- Delivered User Management System and Leave Management System with Spring Boot + Thymeleaf.
- Focused on secure CRUD design, token-based authentication, and MySQL persistence.

Key Skills

- Java, Spring Boot, WebFlux, NodeJS, JavaScript
- PostgreSQL, MySQL, Oracle
- Git, JIRA, Confluence, Kafka, Hazelcast, Grafana, CI/CD
- API Development (REST, SOAP, ISO 8583), Secure Coding, Microservices, Fraud Detection, Payment Systems

Certifications & Training

Secure Code – Multimatics (2024)

Software Test API with Wiremock

– Trengganis (2024)

Grafana – Jalin (2023)

Metrodata Coding Camp – Java

(2021)
